THE COMPLETE BUILDING ENVELOPE SYSTEM

BARRICADE®

COMPLETE BUILDING ENVELOPE SYSTEM

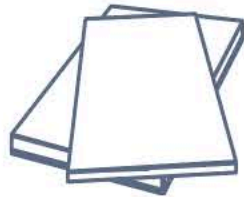

Builders know that every detail matters. Choosing compatible wall envelope products is vital in ensuring your building has the maximum level of defense against exterior moisture penetration. Barricade's complete building envelope system optimizes your home's weather resistance capabilities by selecting products engineered to work together.

INTRODUCING

DIGITALLY-PRINTED HOUSE WRAP

With Barricade[®], builders can now promote their brand and attract local interest with impactful logos, custom messaging, and contact information all on one roll of premium grade house wrap. With no set-up fees, and state-of-the-art print technology, builders can now choose from a spectrum of high-resolution colors and gradients at no extra cost.

Digital printing also helps national and regional builders achieve environmental sustainability objectives, given its positive impact on the supply chain, with no need for printing plates and less ink and water waste generated compared to traditional flexographic printing. In addition, lower minimum order quantities have a direct impact on warehousing and obsolescence.

THE CHANCE TO INCREASE BRAND AWARENESS JUST BECAME LIMITLESS

Maximize your brand's impact on local communities by selecting one of four Barricade[®] House Wrap products, and requesting digital print services. Need help with artwork? No problem. Barricade Building Products offers in-house design assistance to help you achieve the perfect messaging, accurate sizing, and placement guides for all your ideas.

HOUSE WRAP

Whether you're looking for a builder-grade perforated house wrap or a high-performance wrap matching the benefits and reliability of major brands, we offer solutions to meet your needs, manufactured under high-quality control standards. Each of our Barricade® House Wraps are engineered with high performance features that offer faster, easier, and more reliable installs.

Reduces Air Penetration

Resists Bulk Water Damage

Prevents Moisture From Solar Vapor Drive

Protection Against UV Exposure & Damage

Barricade® Wrap

The Economical, Builder Grade Option

- Micro-perforations designed for maximum performance
- Cross-woven polyolefin material with superior strength and tear resistance
- 11 US Perm Rating
- Up to 12 months of UV protection

Barricade® Wrap Plus™

Ultimate Protection Against Wind, Air, and Moisture

- Non-perforated
- Highest level of protection against wind, air, and moisture
- Surfactant resistance from pressure washing, job-site chemicals, and more
- 16 US Perm Rating
- Up to 9 months of UV protection

Barricade® Wrap Plus™ Drainage

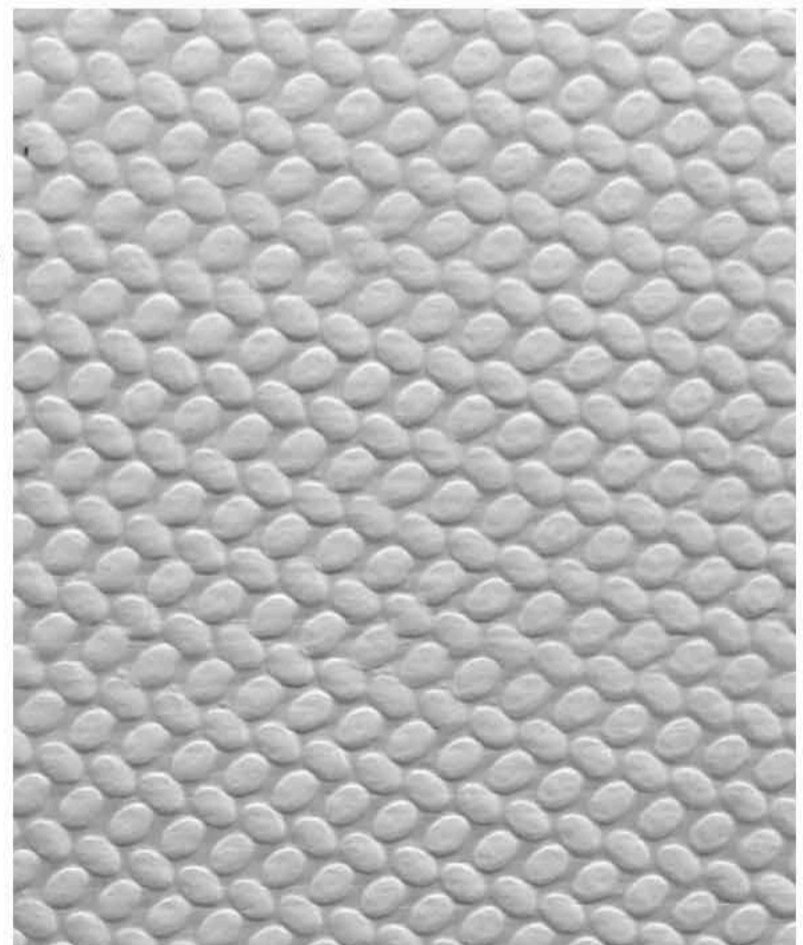

High-Performance Drainable Wrap

- Non-perforated, non-directional surface pattern drains water down and away from envelope
- Maximum protection against mildew, mold, and structural failure
- Perfectly designed for fiber cement, stucco, stone veneer, and EIFS
- Surfactant resistance from pressure washing, job site chemicals, and more
- 18 US Perm Rating
- Up to 9 months of UV protection

Barricade® R-Wrap®

Premium, High-Perm Protection

- Non-perforated
- Micro-porous, breathable membrane protects against air and moisture
- Surfactant resistance from pressure washing, job-site chemicals, and more
- 50 US Perm Rating
- Up to 9 months of UV protection

Barricade® Wrap Plus™ Drainage
Non-Directional Surface Pattern

STRUCTURAL SHEATHING

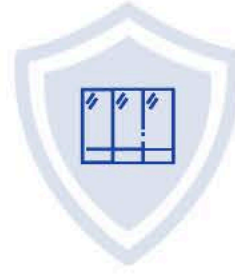

Our Barricade® Thermo-Brace products incorporate an air and moisture barrier on both sides of our light-weight structural sheathing solutions. Saving on labor and material costs, our sheathing line offers a better alternative to OSB and expensive, heavier panel system competitors.

**Protects Against
Water, Vapor, and Mold**

**Engineered with
Non-Toxic Materials**

**Superior Racking
Resistance**

**Faster Install and
Reduced Labor Costs**

Barricade® Thermo-Brace®

Three Products, One Install

- 3-in-1 product offering Structural, Air Barrier, and WRB benefits
- Weather resistant barrier on both sides
- Reflective foil facings for increased energy performance
- Printed nail patterns for ease of installation
- Custom sizing available, eliminating excess scrap
- Three grades available: Green, Red, and Blue

Barricade® Thermo-Brace® S.I.B.™

4-in-1 Reversible Sheathing Solution

- 4-in-1 product offering Structural, Air Barrier, R-Value, and double-sided WRB benefits
- Features GREENGUARD certified BASF Neopor® Graphite Polystyrene (GPS) rigid insulation
- Lightweight structure for faster and safer installation
- Complies with International Energy Codes & certified for Gold Indoor Air Quality
- Two 2018 energy code options, R3 and R5, designed to resist heat flow and temperature conduction
- Improved Long-Term Thermal Resistance (LTTR)

INSTALL THAT CUTS DOWN ON
LABOR TIME AND COST

WINDOW & DOOR FLASHING

90% of leakage problems occur at the transitions between building envelope components, such as windows, doors, and other through-the-wall penetrations, although these transitions comprise only one percent of the envelope's area.¹ Barricade's peel and stick flashing products intercept and direct the flow of water to designed drainage paths to prevent water from penetrating building structures. Each of these products provide a permanent, flexible, weatherproof seal, free from VOCs, and solvents.

Barricade® Flash Right™ Asphalt-Based SBS Flashing

- White polyolefin faced
- Asphalt based SBS adhesive
- Easy to remove release liner
- Up to 180 days of UV protection

Barricade® Flash Ulti™ Premium Butyl-Rubber Sealant

- Polyolefin faced
- Peel and stick installation using butyl-rubber adhesive
- Kraft paper release liner, self-adhesive strip
- Up to 365 days of UV protection

Barricade® Flash Conform™ Flexible, Slower Acting Adherence

- Polyolefin film backing with polyethylene liner
- Peel and stick installation using butyl-rubber adhesive
- Slower acting adhesive allows for easy repositioning
- Stretchable material easily seals around radius and corners
- Up to 365 days of UV protection

Barricade® Flash Extreme™ Extreme Cold Weather Adherence

- White polyolefin faced, non-asphaltic
- Pressure sensitive adhesive
- Application temperature down to -30° F
- Up to 180 days of UV protection

Barricade® Flash Corners™ Pre-Cut, Sill Corners

- White polyolefin faced, non-asphaltic
- Pressure sensitive adhesive
- Pre-cut flashing material for quickly, easily, and inexpensively flashing a window
- Up to 365 days of UV protection

¹(Path Evaluation, April 2006, Laboratory and Field Evaluations of Pan Flashing/Sill Protection and Water-Resistive Barriers. NAHB Research Center, pg 3.)

CONSTRUCTION TAPE

Optimize your home's weather resistance by implementing Barricade® Seam Tape as part of the wall envelope's secondary line of defense against exterior moisture penetration. Provide added protection by sealing the gaps, cracks, and crevices where air can easily penetrate the home, and ultimately affect your heating and cooling costs.

Barricade® Seam Tape

Cold-Weather Acrylic Construction Tape

- Polypropylene film coated with a cold-weather acrylic adhesive system
- Tapes seams and overlaps in building wrap and sheathing
- Suitable for small repairs including rips, punctures, or tears in sheathing or house wrap material
- Up to 180 days of UV protection

ROOFING UNDERLAYMENT

Barricade Roof Underlayment is an essential layer of protection that combats harmful forms of precipitation and bad weather. Our underlayments feature wrinkle-free materials and a cool gray color that reduces the surface temperature. Both UDL products come standard with a non-skid coating that provides ultimate protection from possible damage from moisture and tears, backed by a 20-year limited warranty.

Temperature
Controlled Materials

Safer, Reliable Traction
with Non-Skid Surface

Coverage Per Lap*

Reliable Water
Resistance

Barricade® UDL Standard™

The Builder Grade Choice

- Woven synthetic material
- Builder grade material at cost-effective price point
- Up to 60 days of UV protection

Barricade® UDL Pro™

Premium Grade Protection

- Woven synthetic laminated to non-woven top layer
- Slip-resistant top layer
- Laminated, non-skid coated bottom layer
- Up to 180 days of UV protection

CODE COMPLIANT

ASTM D226 I & II: Standard Specification for Asphalt-Saturated Organic Felt Used in Roofing and Waterproofing

ASTM D4869 II & IV: Standard Specification for Asphalt-Saturated Organic Felt Underlayment Used in Steep Slope Roofing

FLORIDA CODE LISTING:
UDL STANDARD: #17858-R1
UDL PRO: #16453-R4

*When using 48-inch width compared to 36-inch felt

Barricade® Building Products manufactures building envelope system products in Doswell, Virginia outside Richmond. The system, covered by a 10-year warranty, includes one of the widest portfolios available: House Wrap, including Drainable Wrap and Digitally-Printed House Wrap, Structural Sheathing, Structural Insulative Board, Window & Door Flashing, Construction Tapes, Roof Underlayment, Floor Underlayment, and Interior Board.

Barricade Building Products is a member of **INDEVCO North America, Inc.** Building Products Division. Barricade® is an INDEVCO North America brand.
